## The Moon

I would like to build this website as one long page, to convey the size of space and how far away the moon is from the earth. Because the moon is a large topic, I want the website to focus on the earth's relationship with the moon and they effects that they have on each other.

- **Home Page/Introduction**- Basic introduction to the moon, particularly in its relation to earth and exploration of it. Also, a possible discussion of the Name/Etymology.
- **Orbit Around Earth**- particularly the shape and length of the orbit
- **Tidal Effects**- the moon's impact on tides
- **Eclipses**- Lunar eclipses, when they occur, why they happen.
- **Sources**
